## WHAT A BUYER ACQUIRES

An operating homeschool software product with connected planning, evidence and administrative workflows. The growth opportunity is distribution and activation: sales to date came from light organic posts on Facebook, Instagram and Pinterest, without a formal marketing program.

Transaction scope, intellectual property, customer data transfer and transition support are subject to diligence and definitive agreement.

# Built for the parent workflow

Plan the week. Record what happened. Keep proof organized. Prepare the next decision.

### Planning and attendance

Daily and weekly planning, lessons, calendar items, school-day records and time tracking.

### Progress and evidence

Child profiles, goals, skills, assessments and a portfolio for photos, files and learning evidence.

### Paperwork and money

Reports, transcripts, compliance-oriented records, documents and homeschool expense tracking.

### Household operations

Membership permissions, subscription billing, reminders and optional AI assistance.

## TECHNOLOGY SUMMARY

| | |
